

**A BETTER CLEAN WITHOUT
WATER, SHAMPOO OR STEAM!**

Residential & Commercial

Green Steps Carpet Care TM

Take the *1st* Step In Environmentally Preferred Carpet Cleaning

Carpet is an important part of how people see your entire facility.

When your carpet is clean, everything else looks better. But too often, carpet cleaning is delayed to avoid taking the carpet out of service for long periods of time. The beauty of the Dry Extraction Carpet Cleaning System we use is that cleaning can be routine and not a special project, because carpets are back in service as soon as the cleaning is done. With Green Steps Carpet Care Maintenance Program, carpet can be clean, dry and look its best every day.

- * No Wet Carpet Means NO MORE Breeding ground for Mold & Mildew Causing Musty Smell.
- * No need for fans to dry the carpet.
- * Carpet Stays Cleaner Longer. Unlike wet cleaning methods, our system doesn't leave any sticky, soap residue behind to attract dirt and cause resoiling - and spots won't wick back.
- * No more off-hour scheduling.
- * Safe & Approved for All Types Of Carpet and Rugs.

HEALTHCARE

Success and profit hinge, in part, on keeping virtually all furnishings – particularly carpet and tile flooring – in use on a daily basis and available to residents and guests, and most importantly for turn around and accommodation of incoming patients.

Because Green Steps Carpet Care uses a dry carpet cleaning system there are no wet carpets to deal with so you can deep clean any time and carpets are ready for traffic immediately.

HOSPITALITY

For more info please visit our informative and attractive website
www.GreenStepsCarpetCare.com

Many businesses such as hotels, casinos, restaurants, theaters, airports etc., use the Dry Carpet Cleaning system which we use to keep their carpets clean, and open to foot traffic.

Carpet downtime in the hospitality industry means lost revenue. Why shutdown large carpeted ballrooms, hotel rooms, corridors and lobbies and inconvenience customers to allow wet carpet to dry for 12 or more hours? It literally doesn't make any sense. Since our system is a dry carpet cleaning system, carpet doesn't get wet. That means carpet is never taken out of service to allow for drying time.

And because Green Steps Carpet Cleaning uses dry carpet cleaning system, we can clean carpets any time of the day, instead of waiting until the middle of the night when foot traffic is low. Carpets can be cleaned in the same amount of time, and just as well as the hot water extraction method, but they'll never be taken out of service for drying time.

EDUCATION

The education field puts a demanding strain on carpet. With more schools and universities open year round, the time available to properly clean the carpets is shrinking. Fortunately you found Green Steps Carpet Care

The Dry Carpet Cleaning System is the ideal, money-saving method to keeping your carpets looking fresh and new year round. Why is our system is the best choice for schools and universities? Consider this:

Because Green Steps Carpet Cleaning is a dry carpet cleaning system, you can :

Keep large sections of carpet, such as classrooms, foyers and corridors, open during the cleaning process. Unlike the hot water extraction method, which requires a drying time of 12 or more hours, carpet is open to foot traffic immediately after cleaning.

Clean carpet any time of the day. Instead of waiting until classes are over to clean carpets, we can do this because there is no drying time required. Carpet is open to foot traffic immediately after cleaning.

Clean carpets more often than just over the holidays or during summer break. Having the ability to clean carpets more often will keep them in better condition, and ultimately save money by greatly reducing the need to constantly replace carpet.

GREEN CLEANING

No other carpet cleaning product has the variety of independent certification and research that the dry carpet cleaner we use has.

- * GREEN SEAL CERTIFIED.
- * USDA BioPreferred Certified and is 100% Biobased..
- * Helps Earn LEED Credit.
- * Approved by Environmentally Conscious Schools.
- * Wool Safe Approved..
- * The Machine / Product We Use is Manufactured by a company which is Recognized as Champion in the EPA's Design for the Environment SDSI Program.

CORPORATE

Carpet plays an important role in establishing the image you are trying to project. As people enter your facility the appearance of the carpet contributes to their first impression of your company. Many commercial facilities use the Dry Carpet Cleaning system which we use to keep their carpets clean and fresh, ensuring that good first impression.

And because Green Steps Carpet Care is a dry carpet cleaning system, we can clean carpets any time of the day. Carpets can be cleaned in the same amount of time, and just as well as the hot water extraction method, but they'll never be taken out of service for drying time.
